ADD ANOTHER LOCK**

A PASSWORD ALONE SHOULD NOT BE YOUR ONLY DEFENCE.

1

Enable multifactor authentication (MFA) on every account that offers it.

2

Where possible, use an authenticator app such as Microsoft Authenticator, Google Authenticator or Duo.

3

Use biometrics, such as Face ID, when available.

4

Do not reuse passwords or simple variations of an old password.

Turn on MFA for your email, online financial services, social media and other important accounts. If an unexpected login code arrives, don't share it with anyone.

YOUR CHALLENGE:

Turn on MFA for ONE important account today.
